

# Traffic in Shere

This is an exhibition of proposals for traffic calming in the village of Shere.

The scheme is the third revision following local consultation and discussions with the Parish Council.

Since the study for traffic calming began, it became clear that some form of one way system in Upper Street should be considered.

There are three options before us now are:

1. Do nothing
2. Adopt the traffic calming scheme as described in this exhibition for immediate implementation
3. Adopt the traffic calming scheme but consider some form of one way / no entry road system in Upper Street for implementation as a subsequent stage
